

5300 PLYMOUTH ROAD ANN ARBOR, MICHIGAN 48105 734-930-0995

May 31, 2019

Mr. Sam Barna Assistant Superintendent of Business and Operations Oxford Community Schools 10 N. Washington St. Oxford, MI 48371

RE: 2019 Asbestos Inspections Asbestos Containing Materials (ACM) List

Dear Mr. Barna:

Pursuant to your request, Nova Environmental, Inc., is providing the 2019 Asbestos Inspections *Homogeneous Area Listing* pages (and any subsequent sampling) for the following schools: Axford Elementary School, Clear Lake Elementary School, Lakeville Elementary School, Leonard Elementary School, Oxford Elementary School and Oxford High School.

The Homogeneous Area Listing pages list suspected materials and identify the materials as "Negative", "Positive" and "Assumed" for ACM. Bulk samples were collected for the Negative and Positive materials. Assumed materials are those that are not able to be sampled (without destructive measures) such as fire doors, wood floors and boilers. They are assumed positive.

Over the past 120 years, asbestos has been used in the construction of thousands of buildings, including schools and homes, throughout the United States. The EPA has listed over 3,500 products that have contained asbestos, many of these as building components.

It is important to understand that the simple presence of asbestos in a building is not a concern. It is when the asbestos fibers are released from the building component into the air that it becomes problematical. Therefore, it is during renovation and demolition activities that the bulk of the applicable asbestos regulatory standards apply.

As a result of passing the bond issue, the Oxford Community School's administration recently contracted with an environmental consulting and testing firm, Nova Environmental, Inc. to conduct updated asbestos inspections within the buildings in order to ensure that the District knows where asbestos is located. The inspections serve two primary purposes.

- 1. To ensure that the presence, quantity and location of asbestos can be provided to outside contractors (as required by the OSHA Asbestos Construction Standard and the EPA's AHERA regulation);
- To identify those locations of asbestos that will need to be removed in order to support the bond issue construction activities (as required by applicable Federal and Michigan State regulations).

Page 2 Letter to Mr. Sam Barna

Nova Environmental, Inc. can provide additional information presentations on asbestos upon request.

Let me know if you have any questions.

Thank you, NOVA ENVIRONMENTAL, INC.

Adam Amin Environmental Consultant

Enc.

Axford Elementary School Homogeneous Area List

Homogeneous Area Description	HA#	Asbesto
Concrete	1	Negative
Cinderblock	2	Negative
Cinderblock Mortar	3	Negative
12" x 12" Floor Tile - Gray w/ Multi-color Specks	4	Negative
